

IOBAC MagTabs™ – MT4 and MT4+ Technical Data Sheet

Product Description

Magnetic on one side and with acrylic-based adhesive on the other, IOBAC MagTabs easily affix +4mm vinyl tiles, woven vinyl and carpet tiles onto metal raised access floors, [Ezy-Install Underlay](#) and [IOBAC magnetic receptive resins](#).

2 Dimensional Hold: Not only are tiles held together horizontally as per conventional floating floor solutions, but due to magnetic attraction, the IOBAC MagTabs also enable a strong grip in the vertical direction, ensuring tiles are secured well in place until the time comes to uplift them.

Dual Grip technology: Our next generation **MT4+ MagTabs** are thinner, lighter, yet stronger than ever before, thanks to IOBAC Dual Grip technology which combines dry-tack adhesion with magnetism for phenomenal grab.

Clean Removal: Floor tiles can be removed cleanly and easily for reuse or recycling, with the base left contamination-free and ready for the next flooring installation straight away.

Product Composition

Flexible strontium ferrite magnetic tabs kiss cut onto a silicone release liner for a quick and easy peel. Supplied on a roll.

- Contains no plasticisers
- Phthalate free
- Acrylic based adhesive
- Odourless products

Storage and Disposal

Resistant to extremes of moisture and temperature - constant working temperature of -30°C to 60°C.

MagTabs can re-used dependent on the backing of the flooring product, as well as be down-cycled or recycled. The release liner is also recyclable.
